

# FUTURE DESIGN QUALITY IN UNIVERSITY BUILDINGS CAMPUS

*Edited by* IAN TAYLOR

RIBA  Publishing

**HEDQF**  
Higher Education Design Quality Forum

Produced in association with the Higher Education Design Quality Forum (HEDQF), this book aims to help architects, design teams and university clients in their pursuit of practical and innovative solutions for the creation of higher education learning environments.

This book argues that investment in the higher education sector is a driver for intellectual, social and economic development, offering opportunities for positive impacts for the physical environment on the character and performance of higher education. Good outcomes result from good design.

Including abundant examples of solutions to design problems and advice on best practice, it has contributions from leading-edge practices and academics, including case studies with highly illustrated project examples. All this is underpinned by an understanding of the practicalities of working in the sector as well as the socio-political and economic contexts and the trends shaping future practice.

#### **ABOUT THE EDITOR**

Ian Taylor is an architect and partner at Feilden Clegg Bradley Studios. He has extensive experience in the design and masterplanning of university buildings and schools and leads the Research and Innovations Team in the practice.
